

## Roadmap

## 2000-Watt Society

	Consumption					Buildings	
	Areas of action					Areas of action	
1 2 3	Goods and products: Reviewing requirements and consuming in an environmentally conscious manner Producing food in an ecological manner and using with consideration Closing materials cycles: promoting reuse,		ect		9 10 11	Reducing requirements of buildings and services (e.g. area) Optimising existing properties from an energy perspective Designing new buildings for minimum energy consumption Using energy-efficient materials and devices Supplying properties with renewable energy	
4	recycling and utilisation  Developing and promoting new forms of consumption	;	t eff			Measures of the City	
	and production	Status	Level of effect	Effect	G1	Further development of energy coaching and energy consulting	
K1	Measures of the City  Implementation guidelines on ecological procurement in procurement processes in municipal administration		-	<u> </u>	G2	Strengthening of energy-related optimisations in building operations	
(2	Sustainable diet in public facilities (local, seasonal, preferably plant-based, reduction in food waste)	•		<b></b>	G3	Implementation and further development 7-Milestones as municipal building standard	
K3	Expansion of recycling (e.g. slag processing)				G4	Area reduction per functional unit in City's own properties	(
K4	Reinforcing communication on the 2000-Watt Society	0		4	G5	Enforcement of occupancy regulations in City's own properties	
K5	Strengthening of the green industry (e.g. resource-friendly products, repair, sharing, plastics recycling)			<b>⋖</b> —	G6	Implementation of 2000-Watt specifications in portfolio strategies of the City's own buildings	
VC	Measures of the canton and of the federal government	31/4			G7	Cost-benefit consideration of the 2kW specifications in construction projects	(
K6	New steering fees for other resources (e.g. areas, raw materials)	Alle.		_	G8	Reduction in requirements of buildings (e.g. mechanisation, equipment, area per functional unit)	
	Settlement					Measures of the canton and of the federal government	
	Areas of action				<b>G9</b>	Continuation «The buildings programme»	-
5	Reducing area consumed for living, working and infrastructure		Ħ			Ongoing tightening of minimum standards and energy label for	(
6	Implementing attractive, mixed and compact forms of housing		Level of effect Effect		G11	electricity applications  Entrenchment of the model regulations of the cantons in the energy sector (MuKEn 2014) in cantonal legislation	-
				#		energy sector (Marker 2014) in caritorial legislation	
7	Reducing need for motorised mobility	atus	Ne Ne	<u>ě</u>	G12	Introduction of electricity steering fee	(
7	Reducing need for motorised mobility  Measures of the City	Status	Level	Effect		Introduction of electricity steering fee	(
	Measures of the City Identification of concentration potential and area planning	Status	Level	Effe		Introduction of electricity steering fee Obligation to renewal fund when purchasing property to finance future redevelopments with regard to energy	(
S1	Measures of the City  Identification of concentration potential and area planning for areas with special usages	Status			G13	Obligation to renewal fund when purchasing property to	4
S1 S2	Measures of the City  Identification of concentration potential and area planning for areas with special usages  City of short distances (e.g. social and functional mix, usage of ground floor)	Status		<b>▶</b>	G13 G14	Obligation to renewal fund when purchasing property to finance future redevelopments with regard to energy	1
S1 S2	Measures of the City Identification of concentration potential and area planning for areas with special usages City of short distances (e.g. social and functional mix, usage	Status			G13 G14 G15	Obligation to renewal fund when purchasing property to finance future redevelopments with regard to energy Extension of fiscal deduction period for overall redevelopments Introduction of redevelopment obligation for buildings with a	-
S1 S2 S3	Measures of the City  Identification of concentration potential and area planning for areas with special usages  City of short distances (e.g. social and functional mix, usage of ground floor)  Ensuring development of free space in areas of concentration	Status		<b>▶</b>	G13 G14 G15	Obligation to renewal fund when purchasing property to finance future redevelopments with regard to energy Extension of fiscal deduction period for overall redevelopments Introduction of redevelopment obligation for buildings with a very poor energy record	-
S1 S2 S3	Measures of the City  Identification of concentration potential and area planning for areas with special usages  City of short distances (e.g. social and functional mix, usage of ground floor)  Ensuring development of free space in areas of concentration and in the portfolio	Status		<ul><li>▼</li><li>▼</li><li>▼</li><li>►</li><li>►</li><li>►</li></ul>	G13 G14 G15	Obligation to renewal fund when purchasing property to finance future redevelopments with regard to energy Extension of fiscal deduction period for overall redevelopments Introduction of redevelopment obligation for buildings with a very poor energy record	-
S1 S2 S3 S4 S5 S6	Measures of the City  Identification of concentration potential and area planning for areas with special usages  City of short distances (e.g. social and functional mix, usage of ground floor)  Ensuring development of free space in areas of concentration and in the portfolio  Realisation of special recreational areas on the edge of the city  Contribution of the 2000-Watt requirements in the planning	Status		<b>▶</b>	G13 G14 G15	Obligation to renewal fund when purchasing property to finance future redevelopments with regard to energy Extension of fiscal deduction period for overall redevelopments Introduction of redevelopment obligation for buildings with a very poor energy record	1
\$1 \$2 \$3 \$4 \$5	Measures of the City  Identification of concentration potential and area planning for areas with special usages  City of short distances (e.g. social and functional mix, usage of ground floor)  Ensuring development of free space in areas of concentration and in the portfolio  Realisation of special recreational areas on the edge of the city  Contribution of the 2000-Watt requirements in the planning procedures  Development of municipal structure plan settlement, landscape and public buildings in close coordination with	Status		<ul><li>▼</li><li>▼</li><li>▼</li><li>►</li><li>►</li><li>►</li></ul>	G13 G14 G15	Obligation to renewal fund when purchasing property to finance future redevelopments with regard to energy Extension of fiscal deduction period for overall redevelopments Introduction of redevelopment obligation for buildings with a very poor energy record	1
\$1 \$2 \$3 \$4 \$5 \$6	Measures of the City  Identification of concentration potential and area planning for areas with special usages  City of short distances (e.g. social and functional mix, usage of ground floor)  Ensuring development of free space in areas of concentration and in the portfolio  Realisation of special recreational areas on the edge of the city  Contribution of the 2000-Watt requirements in the planning procedures  Development of municipal structure plan settlement, landscape and public buildings in close coordination with energy planning	• I			G13 G14 G15	Obligation to renewal fund when purchasing property to finance future redevelopments with regard to energy Extension of fiscal deduction period for overall redevelopments Introduction of redevelopment obligation for buildings with a very poor energy record	1
S1 S2 S3 S4 S5 S6	Measures of the City  Identification of concentration potential and area planning for areas with special usages  City of short distances (e.g. social and functional mix, usage of ground floor)  Ensuring development of free space in areas of concentration and in the portfolio  Realisation of special recreational areas on the edge of the city  Contribution of the 2000-Watt requirements in the planning procedures  Development of municipal structure plan settlement, landscape and public buildings in close coordination with energy planning  Compensation of planning-related benefits in planning projects				G13 G14 G15	Obligation to renewal fund when purchasing property to finance future redevelopments with regard to energy Extension of fiscal deduction period for overall redevelopments Introduction of redevelopment obligation for buildings with a very poor energy record	Alle.

				Energy supply			
				Areas of action			
ces (e.g. area) perspective consumption		ect	13 14	Expanding production of electricity from renewable sources Ensuring purchase of renewable electricity in the liberalised electricity market		ect	
Consumption	sn	Level of effect Effect	15	Heat generation and usage from local renewable sources and waste heat	ns	el of eff	t
	Status	Level ( Effect		Measures of the City	Stat	Leve	Effe
energy			E1	Continuation efficiency bonus for large-scale consumers			
n building	•		E2	Expansion of production of renewable electricity pursuant to ewz electricity future			
lestones as	•		E3	Development of district heating grids to use waste heat from waste combustion			
			E4	Development and adoption of Municipal Energy Planning			٥
n properties			<b>E</b> 5	Promotion of own production and consumption of electricity			
's own			<b>E6</b>	Expansion of municipal funds (former electricity saving fund)	0		
portfolio	•	□ ∢	<b>E7</b>	Development and expansion of networks for the usage of waste heat from cleaned waste water and heat/refrigeration from lake water	0		•
cations			E8	Increasing production and usage of biogas	0		<b></b>
echanisation,	0	□▶	<b>E9</b>	Development of strategy photovoltaic systems for City's own buildings	0		4
l government			E10	Area-overarching heat supply emanating from municipal properties	0		
i government		<b></b>	E11	New funding and financing models and/or accompanying	Sing.		4
